

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental organization which features Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot production facility, which is the home of the Compact Equipment and Construction department. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer desires.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. In addition, there are more than 90 independent dealers moving forklift equipment and materials handling equipment. This system enables Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line remarkably features 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck versions range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck company in the North American marketplace, due to its exceptional level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Lift Truck clients. The U.S. forklift division located in Cleveland has a professional team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion venture. Initial product sales of this manufacturing equipment focused on large business groups, the armed services and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Daewoo started the first home-based lift truck business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a situation of substantial growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling industry. This joint-venture proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a international sales network and started exporting models they had established through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
