

## Seat Belt for Forklift

Forklift Seat Belts - Described in the Regulation guidelines are the use of seatbelts and operator restraints on lift trucks. It says that the liability falls on the employers' to be able to make certain that each machinery, piece of equipment and device is used correctly used according to the directions of the producer.

Rough Terrain forklifts ought to meet the guidelines of ANSI Standard ASME B56.6-1992 in regards to their maintenance, inspection, fabrication, use and design.

Mobile equipment like for example side boom tractors together with a Rollover Protective Structure (ROPS), ought to contain seat belts that meet the Society of Automotive Engineers safety requirements; Society of Automotive Engineers Standard J386 JUN93, Operator Restraint System for Off-Road Work Machines. If any mobile equipment has seat belts required by law, the driver and subsequent passengers have to make sure they utilize the belts every time the vehicle is in motion or engaged in operation in view of the fact that this could cause the equipment to become unstable and thus, not safe.

If a seat belt or various driver restraint is required on a lift truck.

While operating a forklift, the seat belt requirements would depend on a number of factors. Contributing factors to this determination may include whether the the lift truck is equipped along with a Rollover Protective Structure, the kind of lift truck itself and the year the forklift was made. The manufacturer's directions and the requirements of the applicable standard are referenced in the Regulation.

With regards to powered industrial lift trucks, ANSI Standard ASME B56.1-1993 refers to an operator restraint device, enclosure or system. A driver restraint device, enclosure or system is designed in order to help the operator in reducing the chance of entrapment of the head and/or torso between the truck and the ground in the event of a tip over. The system or restraint device could consist of a seat belt, even though a seat belt is not essentially a part of such device or system.
