

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Newly retired, after spending many years working with his brother to develop their crane business into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

Whilst on their journey, John spent time talking to past business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a vast market for a product that could quickly and safely elevate people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has extended itself into several global marketplaces and continues to develop new machines to guarantee that clients are able to become safer and more well-organized within their workplace.
