

Barrel Clamp

Barrel Clamps - A Barrel Clamp is really a mechanical or hydraulic accessory meant for a forklift. It can be utilized so as to compress the item you would like to move utilizing the lift truck and is usually utilized for handling paper rolls, barrels, and kegs. A few types of barrel clamp accessories also have a rotate function. Like for instance, the rotate function permits a lift truck operator to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
