

Meritor Part

Meritor Parts - Meritor is a leading international supplier which is proudly established on a one hundred year custom of service and quality. They concentrate on different integrated systems, modules and parts to original machine makers and the aftermarket for the transportation and industrial sectors.

Meritor values the needs of all their customers to guarantee their success while priding itself in the company's unique energy and feels this output of energy to be their aggressive advantage in their global operations. Meritor starts with a culture which values diversity of people and their broad thought processes. Operating in 19 countries and hiring more than 11,200 people, Meritor promotes collaboration and innovation among a team of experienced experts.

By only employing future focused employees, Meritor strongly believes these top-caliber people will be able to quickly adapt to changing environments and demonstrate the performance and commitment required so as to reach results in the competitive materials handling market. The business empowers their teams to make sound business decisions to be able to improve the overall success of the business. In return, Meritor provides all their staff different opportunities for personal and professional development.

The Advanced Engineering team is on the forefront of components and system engineering. This includes axles, drivelines, braking and suspension systems for medium and heavy duty trucks, buses, military vehicles, trailers and off-highway vehicles. The Meritor Advanced Engineering team is developing. They started a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives which represent the entire Asia Pacific region. This particular team is even responsible for supporting the requirements of their worldwide engineering workers.

Meritor's dynamic and customer focused Quality team is dedicated to ensuring optimum processing at their aftermarket distribution facilities and production plants that are located all over the globe in 19 countries and in 5 different continents.

They have their supplier network that is particularly situated so as to support the development of the business. Every regional team has globally supported quality systems, initiatives and centralized in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making within every part of the company. The DFSS or Design for Six Sigma ensures product reliability within each and every region. The team is even comprised of transactional Green Belts who apply Six Sigma tools to business methods and apply lean techniques.
