

Toyota Forklift Part

Toyota Forklift Parts - Ever since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, have been the best selling lift truck dealer in the U.S. This company has been headquartered out of Irvine, California for well over 40 years, offering a comprehensive line of quality lift trucks. With an impressive reputation of stability and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the keystone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota machinery and parts manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continuous improvement, and its environmental methods. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

Brett Wood, President of TMHU, associates Toyota's achievement to its strong commitment to manufacture the finest quality lift vehicles while delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's biggest lift truck supplier and is among the magazines celebrated World's Most Admired Companies.

Redefining Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company philosophy towards environmental management within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability cannot be matched by other organizations and unquestionably no other materials handling manufacturer can so far rival Toyota. Environmental responsibility is an important feature of corporate decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more intricate 2010 emission standards. The finished creation is a lift vehicle that produces 70 percent less smog forming emissions than the current Federal standards tolerate.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its commitment to the environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and community parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Toyota's lift vehicles offer better durability, visibility, efficiency, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS"•, helps reduce the possibility of accidents and accidental injuries, in addition to increasing productivity levels while minimizing the likelihood of merchandise and equipment damage.

System Active Stability is able to sense situations that may lead to lateral unsteadiness and potential lateral overturn. When any of these conditions have been sensed, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This transitions the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

SAS was first introduced to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS has been integrated into most of Toyota's internal combustion models. It is standard gear on the latest 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory worker instruction, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there has been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's uncompromising standards extend far beyond the machinery itself. The company believes in offering extensive Operator Safety Training programs to help customers meet and exceed OSHA standard 1910.178. Training programs, video lessons and a variety of materials, covering a wide scope of topics-from individual safety, to OSHA policies, to surface and load situations, are offered through the seller network.

Since the transaction of its first lift vehicle in the U.S. to the manufacture of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a solid existence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America now are built in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of land.

Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service components, with the total commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and customers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a training center.

The NCC embodies Toyota's commitment to providing top-notch customer service. TMHU's 68 certified Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all through the U.S, present the most comprehensive and inclusive customer service and support in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing features make Toyota dealerships a one-stop shop to guarantee overall customer satisfaction.
